Table S1: Repetition of the comparison of callosal regional areas between patients with bipolar disorder I and healthy controls in untransformed data*

<table>
<thead>
<tr>
<th>Region</th>
<th>BD, n = 172</th>
<th>Control, n = 146</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Area, mm²; raw mean ± SD</td>
<td>Area, mm²; raw mean ± SD</td>
</tr>
<tr>
<td>Partial midbody</td>
<td>168</td>
<td>59.90 ± 10.90</td>
</tr>
<tr>
<td>Isthmus</td>
<td>171</td>
<td>50.89 ± 12.64</td>
</tr>
<tr>
<td>Splenium</td>
<td>168</td>
<td>180.07 ± 28.66</td>
</tr>
</tbody>
</table>

BD = bipolar disorder; CI = confidence interval; SD = standard deviation; TBV = total brain volume.

*Analyses were controlled for age, sex, handedness, site, past alcohol abuse or dependence, lithium and antipsychotic medication status (yes v. no), symptomatic status (yes v. no) and TBV and were conducted after exclusion of outliers.
†Without outliers.
‡Uncorrected.

Table S2: Repetition of the comparison of callosal regional areas between patients a positive history of psychotic features and patients without a history of psychotic features on untransformed data*

<table>
<thead>
<tr>
<th>Region</th>
<th>BD with psychotic features, n = 113</th>
<th>BD without psychotic features, n = 58</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Area, mm²; raw mean ± SD</td>
<td>Area, mm²; raw mean ± SD</td>
</tr>
<tr>
<td>Rostrum</td>
<td>112</td>
<td>26.84 ± 9.61</td>
</tr>
</tbody>
</table>

BD = bipolar disorder; CI = confidence interval; SD = standard deviation; TBV = total brain volume.

*Analyses were controlled for age, sex, handedness, site, past alcohol abuse or dependence, lithium and antipsychotic medication status (yes v. no), symptomatic status (yes v. no), duration of illness and TBV and were conducted after exclusion of outliers.
†Without outliers.
‡Uncorrected.
